

Let's Nurture the Nature

Our story

Prakrit means the Mother Nature...

Octagonal "Swastik" is the symbol depicting creation of the Universe.

'Green Cross' symbolizes caring for the Environment around us to preserve & protect the Ecosystem, which we all live in...

Orange triangles in the octagon, is symbol of "Life Force" which is emanated on Earth as Solar Energy.

Harmonizing with "Mother Nature" is the only way to *Nurture the Nature...*

Prakrit Krishi Tantra LLP is devoted to serve the society with the above Wisdom!!

We at **PraKriT** have started the journey in January 2012, with the sole objective of serving the Organic farmers by providing training & guidance in techno-commercial aspects in Organic-Biodynamic farming.

In the due course of our journey, we realized that urban citizens, who are the main customers for organic food produced by the farmers, also have the acumen to grow organic food in their vicinity like home garden, terrace gardens in hotels & restaurants, empty spaces of school & factory premises ...this fact encouraged us to organize workshop on "Organic Home Gardening" in the urban societies in cities like Pune, Mumbai, Bangalore, Goa etc.

A journey of 7-8 years since 2012, have been a lots of learning for us, as what to do in future to *Nurture the Nature...*

By the end of 2019, we at **PraKriT**, decided to serve the society also by offering a wide range of products which are hand-picked from source as '*Original & Natural*'. This is a diversification, along with our core activity of Training & Consultancy service in Organic-Biodynamic concept.

Prakrit Krishi Tantra LLP is the transformation of **PraKriT** with even greater endeavor & energy to serve the organic fraternity in India...
